

I am writing in support of giving priority to FM translator service, as opposed to giving priority to LPFM service. My family listens to K-Love radio via FM translator service, providing wholesome and family friendly radio programming (no worries for the FCC in terms of monitoring this station!!) I scanned the radio dial daily until I found K-Love. Now, my children and I can listen to news, music, and commentary together without a 5 second delay. I spend so much time shielding my kids from inappropriate language and programming, it's a relief to just turn on the radio and go about my day. Please continue to allow broadcast of this station in my area!

Thank-you for the opportunity to comment.
